Supply of EEPROM on the engine PWB described in the parts list (Newest version Rev.6 as of June 2018) will be discontinued.

The description of EEPROM (FIG.37 Ref o. 36) will be deleted from the revised version of the parts list planned to release in August 2018.

Field Measure: When replacing the engine PWB, replace the EEPROM on the old PWB in the new engine PWB. (Refer to the service manual chapter 4 [Note when replacing the engine PWB]

In case of the EEPROM failure necessary to replace, report to each regional HQ as well as for other products.

First implemented timing at factory: This is the information of the service parts setting of the approval label for the local use only

N00101981; N00100991
